

M-410 S Dynamic Moving Coil Microphone, for Public Address

The M-410 is a dynamic moving coil microphone, especially suited for close talking, for public address purposes. It is an improved version of the BEYER M-41 and is supplied with an On/Off switch. Due to the cardioid characteristics, acoustical feedback has been reduced to a minimum. The microphone can be held close to the sound source without danger of overmodulation.

PRICE: \$ 50.00

Specifications:

Frequency response: 300 — 12000 cps

Output level at 1 kc: 0 dbm
= 1 mw per 10 ubar

0.25 mv/ubar (—50 dbm)

Polar pattern: cardioid

Output impedance: 200 ohms

Connections: Connector microphone socket T-3080/2 without cables.

Dimensions: 1.6", length 4"

Nominal frequency response
